Gatsby: Predict the Guests Attending!

Make better everyday estimations with a simple statistics!

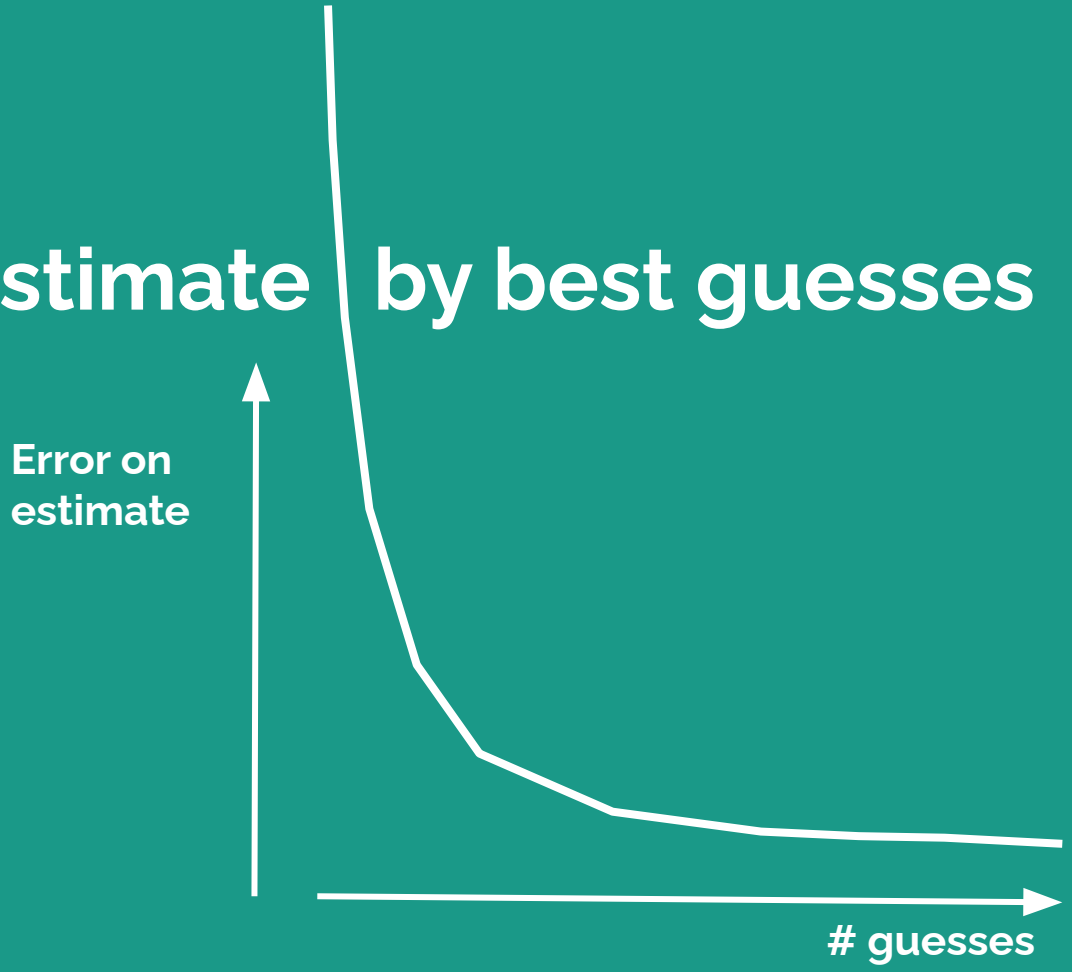
The Problem: the guestlist

Invite:

to few
-> party will be lame

to many
-> mayhem starts

The Idea: estimate by best guesses



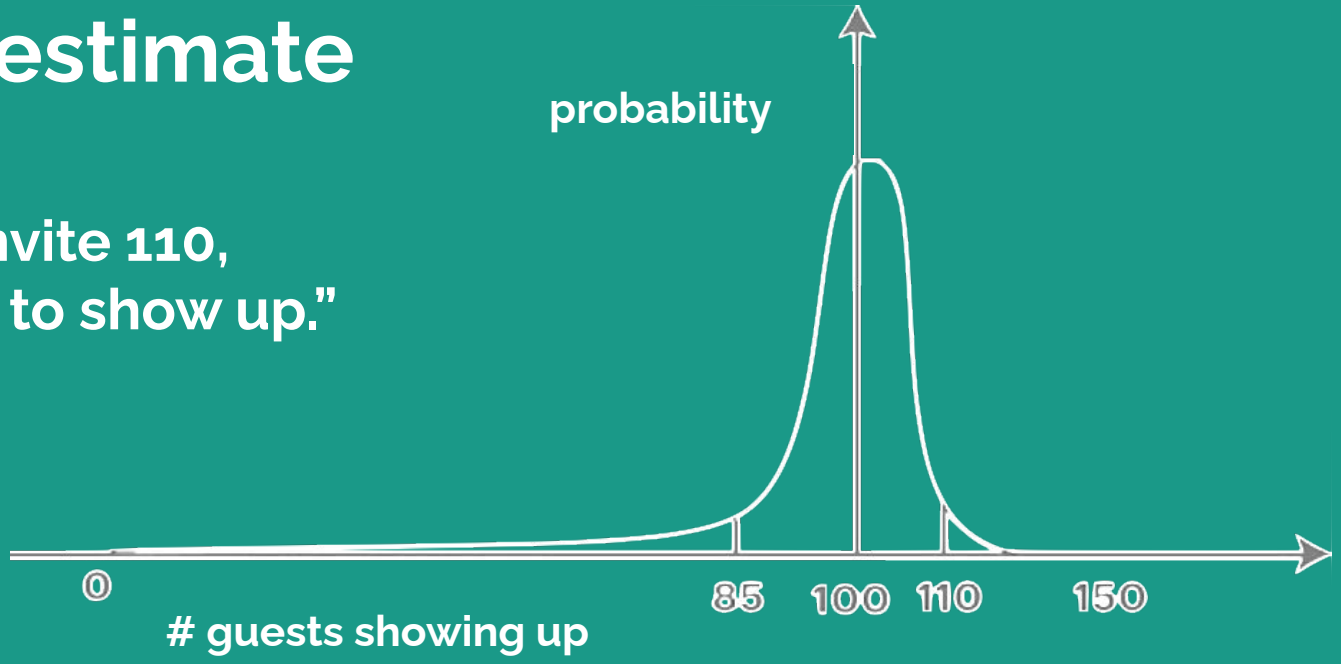
The How: by best guesses

Guest Priority

Guest	# Likely to show up
John	Certainly
Emma	Flaky
Freddy	Probably

The Out: estimate

"You should invite 110,
for about 100 to show up."



Gatsby: Predict the Guests Attending !

Make better everyday estimations with a simple statistics!

And more .... **time estimates are next up**

Anyone welcome!

Tech Stack
Backend: **Python**
Frontend: TBC
